## MATERIAL CLEANING AND CARE INSTRUCTIONS

Remove all large or abrasive debris from material surface prior to conducting wet scrub cleaning. Add 10 oz of Diversy Profi Floor Cleaner and Grease Remover or any neutral pH(7-9) detergent per gallon of water to create a diluted cleaning solution. Apply solution to rubber. allow solution to saturate for 7 minutes, then scrub thoroughly with an autoscrubber using a 3M Blue Cleaner Pad 5300 (Recommended) or a Mop & Bucket. **DO NOT** flood material with water or cleaning solution. Extract cleaning solution from surface, then rinse surface with clean water until all cleaning solution is removed. Allow to dry prior use.

## MATERIAL DISINFECTING

### DISINFECTING INSTRUCTIONS

Before beginning disinfecting procedure, be sure to conduct Material Cleaning and Care procedure first. Allow material surface to fully dry. To begin disinfecting procedure, apply an EPA approved disinfectant (LYSOL® Brand I.C.™ Quaternary Disinfectant is recommended). Dilute 1/2 oz of LYSOL® Brand I.C.™ Quaternary Disinfectant per gallon of water. Thoroughly apply solution to rubber surface using a sponge, cloth, or spray. Allow solution to sit for a minimum of 10 minutes before rinsing or air drying. Wet vacuum any remaining wet areas.
